RS03 SKID STEER LOADER

Various accessories such as hammers, rippers, timber grabs, and rakes can be added to meet more job requirements.

Quick change can be convenient and quick to replace the auxiliary equipment.

Safe operation, can realize 360° omni-directional operation

Detachable inspection panel is convenient for inspection and inspection of sprockets and travel motors can be more rigorous.

The B&S environmentally friendly engine meets the Euro V and EPA cylinder displacement standards.

Both the wheel type and the crawler type adopt chain transmission (four driving forces), so that the transmission efficiency is higher

There are anti-skid stickers on the pedals to prevent slipping when operating the machine.

EXCELLENT BASIC PERFORMANCE

ENGINE

The design has a compact structure and powerful performance. The engine adopts B&S XR2100, which has low fuel consumption, small vibration and low noise, and has reached a high level of environmental consideration.

PETROL ENGINE — B&S XR2100

10 kw/3600rpm

[SPEED MODE ADJUSTMENT] (standard configuration)

When working, just push the pull rod, the engine speed will automatically adjust the speed, and adjust the speed gear according to the working mode to make the work more humanized

[SUPPORT ROLLER]

Both wheeled and crawler types use chain drive (four driving force), so the transmission efficiency is higher, and they can work normally in harsh environments. The left and right walking is an independent hydraulic system, and the power is more sufficient.

REPLACE ASSISTIVE DEVICEMODE (standard configuration)

When replacing auxiliary equipment such as hydraulic quick changers, breakers, and wood grabbers, you can easily replace them by pressing the button, which is convenient and quick.
